

Dion's Rash Recovery With Elektra Magnesium Cream

CASE STUDY: (Photos submitted by Dion's mother – Desiree Bingham-Smith)

I am a Naturopathic student practitioner affiliated with the Wellbeing Clinic at the Australasian College of Natural Therapies located in Pyrmont, Sydney. I took this particular case as a practice case and have been monitoring the client ever since.

I have been treating Dion for his Psoriasis since he first came to see me on 7th March 2016 and that was when the first photo was taken. We trialled several other topical ointments and creams, even steroid cream and all only gave temporary relief with only slight improvement. The scaliness improved but the extreme inflammation and redness remained.

In May 2016 he started using the **Elektra Magnesium Cream Herbal** and I again took a follow-up photo on 21st June 2016. The improvement was amazing. All the extreme redness and inflammation had virtually disappeared and the client no longer complained of itchiness.

This, despite the fact that his leg and ankle are usually covered with thick wool socks and work clothes required for his job as a tradesman. ***The client says he noticed results immediately in that the urge to scratch was resolved upon first application. The client noticed a marked improvement within two weeks of using the Elektra Magnesium Cream and is continuing to use it to prevent further flare ups of his condition.*** It is good to know that this is a product he can use long term without any adverse side effects.

I was also treating the client throughout this period with diet and lifestyle modification as well as natural medicines to detoxify the liver and support his immune system. It will still be important going forward to support this client's hepatic and immune systems as the condition tends to return as soon as the topical Magnesium is no longer applied. *The improvement is remarkable as the client has not always been compliant with his diet and lifestyle changes.*

I will be recommending this amazing product to future clients suffering from Dermatitis, Eczema and Psoriasis as it has proven its efficacy. I have obtained Dion's permission to share his story with you as a testimonial for your incredible product.

Regards ,
Sharon Clark (ATMS28793) Student Naturopath
